Generate Access Token

This service implements generating an access token to have access to all the endpoints requiring authorization.

Base URL:

Test Environment - <https://app.autoreglive.com/>

Production Environment - <https://slrsaservices.com>

Endpoint URL:

[/api/Auth/Login](#)

Body Parameters as JSON

Property	Description	Data Format	Mandatory
Username	The username of your account	String	Yes
Password	The password of your account	String	Yes

Sample Request

POST Request

Request Body

```
{  
  "Username": "",  
  "Password": ""  
}
```

```
{
  "token":
    "eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9.eyJodHRwOi8vc2NoZW1hcy54bWxzb2FwLmgyZy93cy8yMDA1LzA1LzI0ZW50aXR5LzNsYWltcy9uYW1lIjoieY2liaWRINzAoNkBiRXRmYW1pLmNvbSIsImhodHA6Ly9zY2hlbWFzLnhtbHNvYXAub3JnL3dzLzlwMDUvMDUvaWRlbnpdHkvY2xhaW1zL25hbWVpZGVudGlmaVVyljoiMjMyMWVNkZWUtZWl1MCooYjAoLTkxN2EtZml1YTQwZTVmODNiliwiVXNIckkljoiNSIsImV4cCI6MTc2MTcyOTMoOSwiaXNzIjoieWWg1ckFwcClSmF1ZC16IllvdXJBCHBVc2VycyJ9.N44HVNgBgBzqVhHkeRWXXXXXXXXXXXXXXXXXXEjM",
  "userName": "xxx6@email.com",
  "roleName": "Approval Admin",
  "roleId": 3,
  "error": "oo"
}
```

Invoice Validation

The service implements invoice validation made on the transaction raised.

Base URL:

Test Environment - <https://app.autoreglive.com/>

Production Environment - <https://slrsaservices.com>

Endpoint URL:

[/api/Processor/Validation](#)

HTTP Verb: POST

Header:

Authorization: Bearer {{accessToken}}

Body Parameters as JSON

Property	Description	Data Format	Mandatory
Reference Number	Reference Number of the Invoice.	String	Yes

Sample Request

POST Request

Request Body

```
{  
  "referenceNumber": "string",
```

```
}
```

Response

```
{
```

```
  "status": "success",
```

```
  "code": "00",
```

```
  "message": "Validation is successful.",
```

```
}
```

```
{
```

```
  "status": "error",
```

```
  "code": "03",
```

```
  "message": "Reference number not found in the system."
```

```
}
```

Response Codes

Status Code	Http Status Code	Description
00	200	Validation is successful.
01	400	Reference Number cannot be null.
02	400	Reference Number has already been paid.
03	400	Reference number not found in the system."

Invoice Payment Processing

The service implements invoice payment processing and notification of payment made on the transaction raised.

Base URL:

Test Environment - <https://app.autoreglive.com/>

Production Environment - <https://slrsaservices.com>

Endpoint URL:

/api/Processor/processPayment

HTTP Verb: POST

Header:

Authorization: Bearer {{accessToken}}

Body Parameters as JSON

Property	Description	Data Format	Mandatory
Reference Number	Reference Number of the Invoice.	String	Yes
Payment Ref	Payment Reference of the Invoice	String	Yes
Amount Paid	The amount paid to the system	Int	Yes
Payment Date	The date when payment is being made	string	No
Bank Code	The bank code	String	No
Bank Name	Name of the bank	String	No
Bank Branch	The branch of the bank.	String	No
Transaction Date	The date of the transaction.	String	No

Transaction Reference	The reference number for the transaction.	String	No
-----------------------	---	--------	----

Sample Request

POST Request

Request Body

```
{
  "referenceNumber": "string",
  "requestReference": "string",
  "paymentRef": "string",
  "paymentDate": "string",
  "bankCode": "string",
  "bankName": "string",
  "bankBranch": "string",
  "amountPaid": 0,
  "transactionDate": "string",
  "transactionRef": "string"
}
```

Response

```
{
  "status": "success",
  "code": "00",
  "message": "Payment processed successfully.",
}

{
  "status": "error",
  "code": "05",
  "message": "Invoice has already been paid."
}
```

}

Response Codes

Status Code	Http Status Code	Description
00	200	Payment is processed successfully.
01	400	Amount mismatch, cannot be zero
02	400	Reference Number cannot be null.
